108.00 OP
168.00 OP

Please replace claims 2-4, 7-9, 21-23 and 26-28 as follows:

2. (Amended) The projector of claim 1, further comprising a reflecting mirror capable of being adjusted to different mounting angles with respect to an incident optical axis and being provided in the optical path between the light source and the modulator.

3. (Amended) The projector of claim 1, further comprising:
a color separating optical system provided between the superimposer and the modulator to separate light output from the superimposer into color light beams;
a plurality of modulators connected with the color separating optical system to produce modulated color light beams;

a color synthesizing optical system that receives the modulated color light beams and outputs enlarged synthesized color light beams which are projected by the projection lens; and
